# GLAMOUR LIVING ROOM

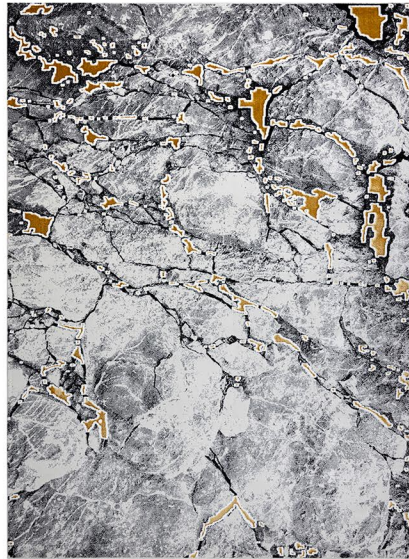

Glamor rugs are fashionable patterns combined with incredibly elegant colours. They will make the rug bring a touch of luxury to any interior. In addition to aesthetic values, their undoubted advantage is also the highest quality of workmanship. The polypropylene with the addition of polyester used in the production will make the household members and guests delighted with the enormity of the comfort provided by the rug. The combination of these fibers makes the rug, depending on the angle of incidence of light, slightly change its shades and the thread will sparkle - this is a natural feature of polyester.

The exclusive design of rugs will perfectly fit into the decor of the living room, bedroom and wardrobe. It will be a perfect complement to modern interiors. In classic arrangements, elegant colors emphasize peace and harmony of style.

Simple, geometric patterns and tassels at the ends refer to the boho style.

The bristles are high, thick and bouncy, making them very fluffy and soft to the touch. In addition, the colours in the shades of cream, beige, gray and pink make the rugs cozy and warm. Reliable polypropylene fiber used for production gives them high quality and durability.

Beautiful patterns in a modern edition will emphasize the character of both classic and modern interiors. Delicate patterns in combination with two levels of fleece will bring a very interesting spatial effect to the room, and the fashionable and expressive colours will perfectly match any colour of the furniture and the floor. Tassels at the end of the rug will add lightness and freshness to the arrangement.

A rug is a very important accessory in any interior. Users praise not only their aesthetic but also practical values. The properties of rugs have been appreciated for many generations. They are a fantastic thermal insulation from a chilled floor, they bring comfort under the feet, and thanks to them you can designate zones in the rooms.

Scandinavian-style rugs were created out of love for minimalism. They were created to visually enlarge and brighten the interior. The use of bright colours makes the living room, bedroom or wardrobe glow. The subtle design will surely fit perfectly into any arrangements suitable for this style.

Rugs imitating animal skin are, contrary to appearances, very popular and fashionable interior decorations. They bring a very cozy atmosphere and constitute a tasteful decoration. Most importantly no animal suffered any damage in the production of these rugs. The rugs are made entirely of synthetic fibers, which is also important for people with allergies.

Animal motifs are perfect for interiors that seemed a bit austere. The living room, bedroom or dressing room will become much cozier. The rug will emphasize a modern interior beautifully, but it will also work great as an emphasis on a rustic interior.

# MINIMALISTIC BEDROOM

When considering a rug for your home, it's worth choosing a colour appropriate to the style that prevails in the apartment or house. So if you focus on minimalism, you will surely like our solid colour rugs.

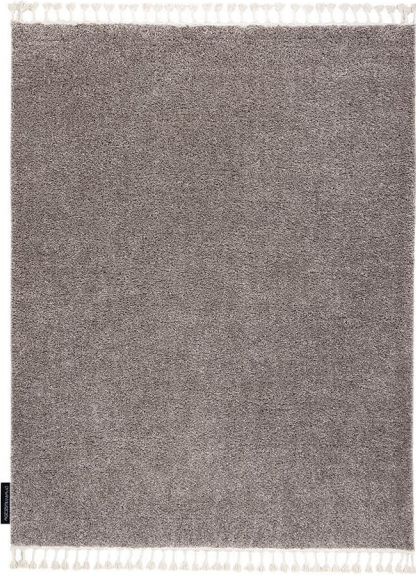

Rugs as a timeless element of interior design are a MUST HAVE for every home. They are not only an interesting decorative element, but also bring warmth and can visually enlarge the space. The combination of delicate colours with minimalistic patterns will fit perfectly into any interior - both modern and classic.

The kitchen is often considered as a unique room in the home. This is where the family spends most of their time preparing and eating meals together. So it's important to create a cozy atmosphere in this place. A suitable rug or runner will perfectly bring out the warmth and complete the arrangement.

Runners are a very universal decoration. They will fit perfectly into kitchen or as a practical decoration in the hallway. The fleece is easy to clean and resistant to pollution, it will be loved not only by fans of fashionable decorations, but also people who like to have a clean house.

# KIDS ROOM

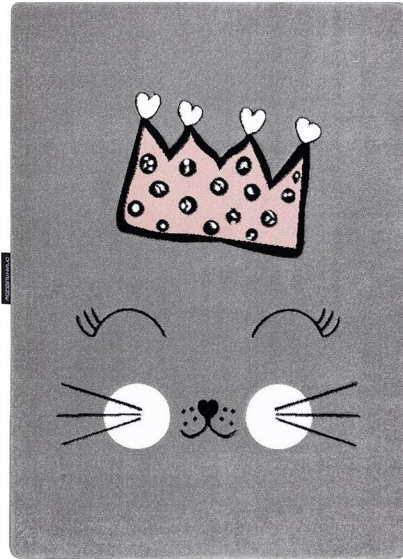

Every parent dreams of creating a cozy and safe room for their child. Children's collections were created to help this dream come true. Soft and warm rugs in beautiful colours will surely brighten and enliven your child's room, at the same time providing a charming corner to play.

There is no doubt that children cannot be looked after sometimes. As soon as they start crawling, they are everywhere. That is why it's so important to protect the surfaces on which they move. Rugs are not only a beautiful decoration that adds charm to a child's room, but most of all they create a safe space thanks to their soft fibers.

Both the balcony and the terrace are great places to relax. We can't always afford a garden, and a private piece of outdoor space is often very valuable. A properly arranged space will provide a place to relax and receive guests on warm days.

Rugs for the balcony increase the comfort of use and make its space a bit cozier. Simply combine them stylistically with other elements on the balcony to enjoy spending time in a pleasant atmosphere. The rugs for the terrace available in our offer will meet the expectations of even the most demanding customers. They are not only an interesting arrangement accessory, but most of all, they are highly functional.
